

GLOBAL - SECOND QUARTER 2022

FIRM: Mar Vista’s purpose is to create value for our investors by generating unique risk-adjusted returns that exceed the opportunity cost of investing in a passive index. Our mission requires a conviction to be different in how we think, behave and invest.

PHILOSOPHY: We invest in high quality growth businesses trading at discounts to fair value. Specifically, we look for competitively advantaged companies with abundant opportunities to grow and reinvest capital at high rates of return. We also seek management teams with a proven ability to allocate capital in ways that maximize shareholder value.

STRATEGY: Mar Vista’s Global strategy seeks long-term capital appreciation by investing in a portfolio of 20-30 businesses. Applying the same investment philosophy and process as our domestic strategies, we invest in global companies that possess attractive per share intrinsic value growth, durable competitive advantages, pricing power, copious amounts of free cash flow, opportunities to reinvest excess capital in high return on capital projects, and the ability to prosper in a variety of market environments.

Since Inception	9.9	9.1	9.6	0.9	8.9	1.7

Quarter Commentary:

For the second quarter of 2022, Mar Vista's Global strategy declined -16.2%, net of fees, performing in-line with the MSCI World Index Net, which was down -16.2%, and slightly underperforming the MSCI All Country World Index Net, -15.7%. Positive stock selection and relative outperformance in real estate, materials and information technology contributed to results during the quarter, while healthcare, financials and an underweight in energy detracted from short-term results.

As inflation across the globe continues to persist near record levels, markets have priced in a higher probability of a recession in the United States and Europe. In fact, a couple of economists have stated they believe the United States is already in recession. Given a much higher probability of an economic slowdown, nearly every asset class (equities, bonds, commodities, real estate) depreciated across the globe. To combat inflation, central banks have continued to tighten monetary policy. All this has led to lower consumer confidence, causing concern in the global equity markets about the path of future earnings. Volatility in the global equity markets is likely to continue in the months ahead due to uncertainty surrounding interest rates, inflation and GDP.

Periods of extreme market volatility are never easy to tolerate but such times do create opportunities for long-term investors. Fear, skepticism and lower stock prices provide opportunities for both higher expected returns and less risk. This market has allowed us to establish positions in businesses that have been in our universe for some time but dearly valued. As always, we continue to evaluate our current holdings and businesses that are in our universe to uncover compelling opportunities with skewed long-term risk/reward characteristics.

On 7/12/07, Silas Myers and Brian Massey formed Mar Vista. On 12/1/07, all of the assets under their management at Roxbury transitioned to Mar Vista through a sub-advisory arrangement. On 1/20/15, Mar Vista finalized an agreement whereby the preferred share class that was owned by Roxbury was extinguished and Mar Vista is majority employee owned. All assets under management are managed by Mar Vista. Mar Vista claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Benchmark returns are not covered by the report of independent verifiers. For the entire period presented, Mr. Myers and Mr. Massey have been substantially responsible for all the investment decisions of the Global Equity strategy.

The Global Equity composite was created in 2012, with an inception date of 12/31/11. All returns are based in U.S. dollars and are computed using a time-weighted total rate of return. The composite is defined to include all fully discretionary, taxable and tax-exempt portfolios with no minimum or maximum account value, managed for at least one month in accordance with Mar Vista's Global Equity strategy, which is a portfolio invested in 20-30 equities, and that paid for execution on a transaction basis. The results in the column marked net of fees for the periods 1/01/12 through the present, include a standard management fee applied to any non-fee-paying portfolio for performance calculation purposes. The primary benchmark is the MSCI World (Net) Index, defined as a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 23 developed market country indexes: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. The secondary benchmark is the MSCI ACWI (Net) Index, defined as a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indices comprising 23 developed and 23 emerging market country indices. In addition, unlike the composite, which periodically maintains a cash position, the MSCI World Index and MSCI ACWI Index are fully invested. Investors cannot directly invest in an index. The dispersion in gross-of-fee composite returns shown herein was measured using an asset-weighted standard deviation formula.

Performance results presented reflect the reinvestment of dividends and other earnings. Gross performance is net of all transaction costs, and net performance is net of any transaction costs, applicable performance-based fees and actual management fees, but before any custodial fees. All returns are calculated net of withholding taxes on dividends and interest. Actual results may differ from composite results depending upon the size of the portfolio, investment objectives and restrictions, the amount of transaction and related costs, the inception date of the portfolio and other factors. Policies for valuing portfolios, calculating performance, and preparing GIPS® composite reports are available upon request.

The Firm's Global Equity fee schedule is as follows: First \$25 million – 0.75%; Next \$25 million - 0.60%; Next \$50 million – 0.50%; Over \$100 million - Negotiable. Special circumstances may cause fees to vary from this schedule and Mar Vista reserves the right to negotiate fees with clients. Fees are payable quarterly in arrears or advance based on 1/4th of the annual rate.

Portfolio data is as of 6/01/2022 and is provided as supplemental information to the Global GIPS® Composite Report. A Global GIPS® Composite Report is available upon request by contacting Mar Vista directly at (310) 917-2800 or by emailing at info@marvistainvestments.com. Benchmark returns are provided for informational purposes only and are not calculated or verified by ACA Compliance Group or Mar Vista. A complete list of portfolio holdings and specific securities transactions for the investment strategy during the preceding 12 months, the top contributors and underperformers calculation methodology and a list of every holding's contribution to the overall performance during the period is available upon request. Top 10 Holdings, Sector Weights and Largest Contributors/Detractors were held in the account of a Global client that Mar Vista believes to be representative of the accounts that Mar Vista manages for this investment strategy during the period from March 31, 2022 - June 30, 2022. Other Mar Vista clients managed with different investment objectives may hold different securities than those listed. The securities listed should not be considered a recommendation to purchase or sell any particular security.
