

GLOBAL - SECOND QUARTER 2021

FIRM: Mar Vista's purpose is to create value for our investors by generating unique risk-adjusted returns that exceed the opportunity cost of investing in a passive index. Our mission requires a conviction to be different in how we think, behave and invest.

PHILOSOPHY: We invest in high quality growth businesses trading at discounts to fair value. Specifically, we look for competitively advantaged companies with abundant opportunities to grow and reinvest capital at high rates of return. We also seek management teams with a proven ability to allocate capital in ways that maximize shareholder value.

STRATEGY: Mar Vista's Global strategy seeks long-term capital appreciation by investing in a portfolio of 20-30 businesses. Applying the same investment philosophy and process as our domestic strategies, we invest in global companies that possess attractive per share intrinsic value growth, durable competitive advantages, pricing power, copious amounts of free cash flow, opportunities to reinvest excess capital in high return on capital projects, and the ability to prosper in a variety of market environments.

SINCE INCEPTION SUMMARY (1Q12 - 2Q21)	Beta	Standard Deviation (%)	Down Market Capture (%)	Up Market Capture (%)	Tracking Error (%)	Alpha (%)
vs. MSCI World® Index	0.88	13.5 vs. 14.3	74.5	93.8	5.0	2.1
vs. MSCI ACWI®	0.87	13.5 vs. 14.5	72.4	96.4	5.4	2.8

Since Inception	13.3	12.6	12.5	2.1	11.9	2.8

Quarter Commentary:

For the second quarter, Mar Vista's Global strategy returned 10.40% net of fees, besting both the MSCI World® Index by 266bps and the MSCI All Country World® Index by 301bps. During the quarter, positive stock selection boosted relative outperformance versus the MSCI World® Index, particularly within Information Technology (+0.85%), Consumer Discretionary (+0.63%) and Communication Services (+0.56%). Top detractors for the quarter include, Materials (-0.23%) and Health Care (-0.16%).

Twelve months have passed since the global economy came to an abrupt stall. Today, equity markets are near all-time highs, as growth rates stabilize in many developed regions due to the rapid reopening of major economies and robust consumer demand. Growth factors dominated off the lows of March 2020, maintaining a stronghold well into November. Traditional value factors then took center stage, particularly within technology, communication services and consumer discretionary. This offered a rare opportunity for value-oriented investors before growth knifed back in June to conclude the second quarter. The global rebound has been driven by a combination of supportive monetary policy and an impressive streak of strong corporate earnings. These tailwinds persisted during the second quarter despite upward inflationary and tax pressures within the United States, casting apprehension on global markets. A swift rise in prices was spurred by heightened consumer demand colliding with a rash of supply chain disruptions. While central banks and governments have proven accommodative during the recovery efforts, policy has begun to diverge as countries recover at different paces.

Companies have emerged from the pandemic with leaner operating costs and are benefitting from a quicker than anticipated reopening of the United States and China economies. While growth rates may lose steam as fiscal stimulus impact wears thin, they should remain relatively strong through the second half of 2021. Inflation will be under the microscope as a rapid increase lends itself to downward macro pressures, particularly in higher-multiple market segments. We maintain our expectation that future portfolio returns will closely correlate with our companies' 12-13% intrinsic value growth. As always, we are diligently working to identify investment opportunities that represent adequate discounts to intrinsic value.

On 7/12/07, Silas Myers and Brian Massey formed Mar Vista. On 12/1/07, all of the assets under their management at Roxbury transitioned to Mar Vista through a sub-advisory arrangement. On 1/20/15, Mar Vista finalized an agreement whereby the preferred share class that was owned by Roxbury was extinguished and Mar Vista is 100% employee owned. All assets under management are managed by Mar Vista. Mar Vista claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Mar Vista has been independently verified for the periods 12/01/07 through 12/31/20. A firm that claims compliance with the GIPS® standards must establish policies and procedures for complying with all the applicable requirements of the GIPS® standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS® standards and have been implemented on a firm-wide basis. The Global Equity composite has been examined for the periods 12/31/11 through 12/31/20. The verification and performance examination reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Benchmark returns are not covered by the report of independent verifiers. For the entire period presented, Mr. Myers and Mr. Massey have been substantially responsible for all the investment decisions of the Global Equity strategy.

The Global Equity composite was created in 2012, with an inception date of 12/31/11. All returns are based in U.S. dollars and are computed using a time-weighted total rate of return. The composite is defined to include all fully discretionary, taxable and tax-exempt portfolios with no minimum or maximum account value, managed for at least one month in accordance with Mar Vista's Global Equity strategy, which is a portfolio invested in 20-30 equities, and that paid for execution on a transaction basis. The results in the column marked net of fees for the periods 1/01/12 through the present, include a standard management fee applied to any non-fee-paying portfolio for performance calculation purposes. The primary benchmark is the MSCI World (Net) Index, defined as a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed markets. The MSCI World Index consists of the following 23 developed market country indexes: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom, and the United States. The secondary benchmark is the MSCI ACWI (Net) Index, defined as a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indices comprising 23 developed and 23 emerging market country indices. In addition, unlike the composite, which periodically maintains a cash position, the MSCI World Index and MSCI ACWI Index are fully invested. Investors cannot directly invest in an index. The dispersion in gross-of-fee composite returns shown herein was measured using an asset-weighted standard deviation formula.

Performance results presented reflect the reinvestment of dividends and other earnings. Gross performance is net of all transaction costs, and net performance is net of any transaction costs, applicable performance-based fees and actual management fees, but before any custodial fees. All returns are calculated net of withholding taxes on dividends and interest. Actual results may differ from composite results depending upon the size of the portfolio, investment objectives and restrictions, the amount of transaction and related costs, the inception date of the portfolio and other factors. Policies for valuing portfolios, calculating performance, and preparing GIPS® composite reports are available upon request.

The Firm's Global Equity fee schedule is as follows: First \$25 million – 0.75%; Next \$25 million - 0.60%; Next \$50 million – 0.50%; Over \$100 million - Negotiable. Special circumstances may cause fees to vary from this schedule and Mar Vista reserves the right to negotiate fees with clients. Fees are payable quarterly in arrears or advance based on 1/4th of the annual rate.

A complete list of portfolio holdings and specific securities transactions for the investment strategy during the preceding 12 months, the top contributors and underperformers calculation methodology and a list of every holding's contribution to the overall performance during the period is available upon request. The securities mentioned in this letter were held in the account of a Global Equity client that Mar Vista believes to be representative of the accounts that Mar Vista manages for this investment strategy during the period from March 31, 2020 - June 30, 2021. Other Mar Vista clients managed with different investment objectives may hold different securities than those listed. The securities listed in this letter should not be considered a recommendation to purchase or sell any particular security. The reader should not assume that investments in the specific securities identified herein were or will be profitable. Past performance is no guarantee of future results. Not FDIC insured, no bank guarantee, may lose value.
